MCNV is an international non-governmental organisation based in The Netherlands that has been supporting development in Vietnam since 1968. MCNV nowadays runs programs and projects which address a broad range of issues in supporting marginalised groups in Vietnam and Lao PDR.

**Mission**
Our mission is to enhance the equitable and sustainable access of marginalized people to resources and services that improve their health and inclusion in developing countries in South East Asia.

**Vision**
We envision a world in which society supports all people in their development to the maximum well-being and a full social position.

**Our programs**
While the context in developing countries in South East Asia is changing quickly, MCNV is responding to the changes. MCNV’s programs and projects are clustered under four themes:

1. **Health**
2. **Social Inclusion**
3. **Livelihood & Climate Change Adaptation**
4. **Entrepreneurship & Value Chains**

We focus on supporting people facing discrimination, the disabled, the poor, women and girls and ethnic minorities, applying sustainable, community based and participatory approaches. We link these, when relevant, to the policy making level.

MCNV is an expertise-based, efficient and flexible network organization. We collaborate with a wide range, and a variety of local, and (inter)national partners. We are looking forward to extend our partner network further. MCNV aims at using its strength in building long-term partnerships in the field and empowering the underprivileged in Vietnam and Lao PDR, but also in other countries in the region as well as further afield.
Our Outreach in Vietnam

Cao Bang
- Support people with disability
- Inclusive education program
